High school Khfacha, Monastir

## Experience

August, 2021

### GOOGLE MEET CLONE

*Reactjs, Nodejs, Express, webSocket, WebRTC*  
Building a mean application that allows users to create meeting rooms and participate in other meetings without creating an account. Users have every essential functionality like screen sharing, video meeting, chat messages, admin controls like kicking users, muting users and etc...

July, 2021

### SMART INTERACT (INTERNSHIP)

*Nodejs, Express, MongoDB, Docker, Kubernetes, AWS, Gitlab CI/CD*  
During my internship, I was a part of this application that links someone who searches for a new opportunity with a company that searches for new talent. I build the backend part of this application, and I was responsible for the infrastructure behind it

March, 2021

### TRIP TRACKER

*Angular, SpringBoot, MongoDB*  
Building a trip tracker application that gives a set of recommendations of accommodations, restaurants, and flights based on the user budget and duration.

## DataBases

MySQL  
MongoDB  
(NoSQL)

August, 2020

### **ADDRESTI MERN APP (FREELANCE)**

*ReactJs, NodeJs, Express, MONGODB*

Starting a freelance job with Addresti consisting of building a MERN stack app that provides several services such as listing products, delivering products using locations and map, statistics management and chatting service.

July, 2020

### **MESSENGER CLONE (MEAN APP)**

*Organisation*

Building a messenger clone from scratch including most of the functionalities, like archiving conversations, deleting messages, sending files, voice recording and also voice and video calls using WebRTC.

July, 2020

### **E-COMMERCE PLATFORM**

*React, Apollo, NodeJs, GraphQL, MongoDB*

Building a basic e-commerce application that allows users to book an item, record orders and also publish items for sell.

Jun, 2020

### **FIVE POINTS E-LEARNING PLATFORM (INTERNSHIP)**

*Angular, NestJs, GraphQL, MongoDB*

During my internship with FivePoints, I was working on an MGAN app that offers online courses and coaching along with chat messaging and certifications.

Jun, 2020

### **TASK MANAGER**

*Angular, NestJs, GraphQL, MongoDB*

When I started learning NestJs, I created this basic application that assigns tasks to a given user by a project manager (Admin user).

May, 2020

### **EVENT DISCOVERY**

*NodeJs, GraphQL*

During my discovery of GraphQL Apis, I build this application to list and add events to users within the platform.

April, 2020

### **MY PORTFOLIO**

*ReactJs, NodeJS, Express, MongoDB*

Building a MEAN application that lists my projects with descriptive details. Also, it provides informations about me.

April, 2020

### **RENT MANAGER**

*NodeJs, Express, MySQL*

Building a Restful API, that manages cars and rents. Also, user account creating and authentication

December, 2019

### **KARYATN WEBSITE (FREELANCE)**

*Angular 8, NodeJS, GraphQL, MongoDB*

Building a MEAN application that makes a strong link between the owner of the car and the user who want to rent it.
